Washington dispatch in New York Sun: Although not generally known, it is nevertheless a fact that Washington, the fourteenth city of the Union in population, contains the greatest negro population of them all. There are more negroes in Washington than in any other city of the Union, not excepting the great cities of St. Louis, Baltimore and New Orleans, all situated in former slave states, and, excepting New Or leans, with more than double its population. There are nearly three times as many black people in Washington as St. Louis. There are more Irish in New York City than in Dublin, and it might be supposed that in that great cosmopolitan centre of population there would be more blacks than in Washington with its 230,000 people. But it is not so; Washington contains more than double the number of negroes counted among New York's 3,500,000.

The distribution of the negroes in the great centres of population is an inter-esting study. The following tabulation, including at least one principal point in each state and several in some states, gives their negro population as shown by the census of 1890, followed by the total population of each. In one respect the table is unsatisfactory. The census figures do not differentiate the white and the black inhabitants of the cities, but it does so differentiate in the coun ties. Therefore, the column headed "negro population" inclues in every instance the black population of whole county in which the city is situated. It is the best that could be done. "Total population," however, includes only the city itself. It may be said, though, that in respect of all the larger cities the figures probably include very few negroes outside the city limits:

some of the figures, especially those re lating to the smaller south, would be absurdly incongruous. For instance, the negro population of Norfolk, as above stated, apparently exceeds the aggregate population of the town by some 5,000. The first col-umn includes all the negroes in Norfolk county, whereas "total population" covers the city itself. It would appear that nearly the total population of Memphis was negro, as well as that of Charleston, Mobile, Little Rock, etc. In the case of Memphis, of course the entire negro population of Shelby county is included; so is the negro populatien of Pulaski county included in Lit-Kings; Boston of Suffolk; New Orleans from this city. One of the men in the of Orleans; Cincinnati of Hamilton, etc.

abled to see at a glance where the bris. Bathurst was thirty-five years of blacks most do congregate. It will be observed that few negroes settle in the far northern cities; their climate is deterrent. Nor have very many found their way to the distant Pacific coast, most probably from want of means The meagre negro population in the large city of San Francisco is surprising. Their favorite belt, so far as disclosed by the population tables of the cities and towns, lies through the horder states, the centre of the country, from the shores of the Chesapeake to western Kansas. Memphis, with only one-quarter the total population, has nearly as many negroes as New Or-leans; Norfolk, with only half the population, has more negroes than Atlan ta; Little Rock has three times as many negroes as Galveston, with no great difference in their aggregate population. Of course, the proportion of blacks to whites in the cotton states cities is generally greater than elsewhere, but in very few of them does the proportion exceed that in Washington. So far as the drift can be detected from the foregoing table it appears to be from the guif states toward the middle belt.

It requires no very great acumen to discern the causes which draw the ne grocs to Washington. The fact, doubt-less, that it is the capital, the fountain head to which they must look for laws and regulations for their protection, has something to do with it. The chief influences are that while the climate congenial both men and women find ready and easy employment here at better wages than elsewhere. They already enjoy here every right granted to their white neighbors, and they are perfectly satisfied to be protected their lives and property, although they have no political status in the district and cannot vote. But the chief point with them is that they have here uni formly kind treatment, more consideration, probably, than is shown them in any other quarter of the country. The Washington negroes are the happiest people in the world, and they are mak-

## What is Gelery King?

It is an herb drink, and is a positive curs for constigation, headache, nervous disor-ders, rheumatism, kidney diseases, and the

prices, whereas the city of St. Joseph on the Missouri side of the river, nearby, with a population considerably more than double that of Leavenworth, returns only 2,974 negroes. St. Joseph had been a slave-holding city, whereas Leavenworth was in a free state.

The black population of Washington

Leavenworth was in a free state.

The black population of Washington in 1880 was 59,596; the increase in the last decade, therefore, was 15,976. The increase between 1870 and 1880 was 16,-192, almost precisely the same, but the proportion of the increase between whites and blacks fell off very considerably on the part of the blacks be-tween 1380 and 1890. What the forthcoming census will show is uncertain, but I do not agree with those who ar gue that the black population has increased here in the present decade more rapidly than the white. It is more probable that the black percentage of increase will fall off more markedly than in the preceding decade. It is unlikely that the black population Washington will exceed 90,000 in 1000, whereas it is probable the total population will be above 300,000. But no city in the Union is gaining so fast in negro population as Washington, whatever the relative percentage may be between the two races next year.

Whether this heavy negro population cities of the at the national capital is advantageous or otherwise either locally or nationally, I leave to the consideration of deeper philosophers than myself. I content myself with stating a few facts. It is growing into a question of interest if

DYNAMITE EXPLOSION.

One Killed and Two Others Seriously Injured.

LOCK HAVEN, Pa., Dec. 29.-Grant Bathurst, assistant postmaster Rote, this county, was killed and two other persons were injured to-day by tle Rock, and so on. St. Louis takes in an explosion of dynamite in the weighall the county of St. Louis city; New master's office of the Bellefont? Lime-York of New York county; Brooklyn of stone Company, at Salona, eight miles 

counts for the close of the year to make quite an active market and some irregularity in prices. The Baltimore & Ohio stocks, after their upward leap of yesterday, were conspicuously affected, the common falling back nearly 3%c and the preferred over a point. feced, the common falling back nearly feced, the common falling back nearly fer constigntion, headache, nervous disorders, tenumatism, kifung diseases, and the various troubles arising from a disordered stomach and torpid liver. It is a most agreeable medicha sadis recommended by physiciane generally. Remember, it cures constignation.

Colery King is sold in Me and 50c paolegues by druggists and feeders.

Ing more rapid progress, perhaps, in education and general advancement than elsewhers.

Special causes of a different nature operate elsewhere to attract them to particular cities.

The negro population of the Tennessee and Kentucky cities is something remarkable. For instance, compare St. Louis and Louisville. The latter city, with only one-third the population of St. Louis, has a negro contingent nearly 7,000 greater. Yet both cities are in former slave states, are almost in the same latitude, and are both river towns, along which the black stream floats to and fro with least impediment. The small comparative negro population of New York and Brooklyn, 34,985 in the aggregate, is also surprising. It will be seen that Phikadelphla contains 5,000 more negroes than Greater New York. Does the attitude of the white pepulation of thene cities toward the negro have anything to do with these figures? Look at Kansas, Topeka's population 18 29 per cent negro; so is that of both Kansas City, Kan, and Leavenwerth. Leavenworth, with only 19,785 peeple all told, has 4,465 negroes, whereas the city of St. Joseph, on the Misseuri side of the river, nearly with a population as 29 per cent negro; so is that of both Kansas City, Kan, and Leavenwerth. Leavenworth, with only 19,785 peeple all told, has 4,465 negroes, whereas the city of St. Joseph, on the Misseuri side of the river, nearly with a population gensilerably more side of the January list disbursaments this year.

Prices of gilt edge investment bonds were not much affected in last week's panel.
